## III. HELPLINES AND SUPPORT SERVICES

<i>24/7 Support Services</i>	13
<i>Other Services</i>	14

This resource outlines CHN's Mental Health, Alcohol & Other Drugs & Psychosocial Commissioned Services.

Capital Health Network (CHN) is the ACT's Primary Health Network. Our role is to advance the way primary health care is delivered in Canberra. We address community needs by collaborating with consumers, GPs, clinicians and sector stakeholders to improve health outcomes. We are unique in our ability to support general practice and design services that fill gaps and deliver lasting improvements.

The ACT and SNSW HealthPathways Program is a free online platform for primary health care professionals that provides condition-based assessment, management, and referral information. The program is a unique cross-border partnership involving CHN (ACT PHN), ACT Health, Southern NSW Local Health District (SNSWLHD) and COORDINARE (South-Eastern NSW PHN).

CHN Commissioned Services do not provide emergency or crisis services. If you, your client, or someone you are caring for is experiencing a mental health crisis, please call Access Mental Health on 1800 629 354 (available 24 hours a day, 7 days a week). Please call 000 if someone is in danger or at risk of harm.

# ACKNOWLEDGEMENTS

Capital Health Network acknowledges the Ngunnawal people as the Traditional Custodians of the ACT and surrounding region, and recognises other people and families with connection to the lands of the ACT. We acknowledge their continuing culture and the ongoing contribution they make to the life of Canberra. We pay our respects to their Elders, past and present, and we thank them for caring for the lands on which we live, work, learn and play.

We extend this respect and gratitude to all Aboriginal and Torres Strait Islander Peoples as the Traditional Custodians of the lands across Australia.

Capital Health Network acknowledges the individual and collective experience of those with lived or living experience of mental ill-health and suicide, and the experience of their carers, families, and supporters. We value and respect the generous and vital contributions of those who share their unique perspectives to guide us to shape an effective and connected primary health care system that supports better outcomes for all.

“Sunrise to Sunset” artwork by Sarah Richards was created to reflect CHN’s cultural journey to date and their Cultural Competency Framework (CCF). See CHN’s [website](#) for more information.

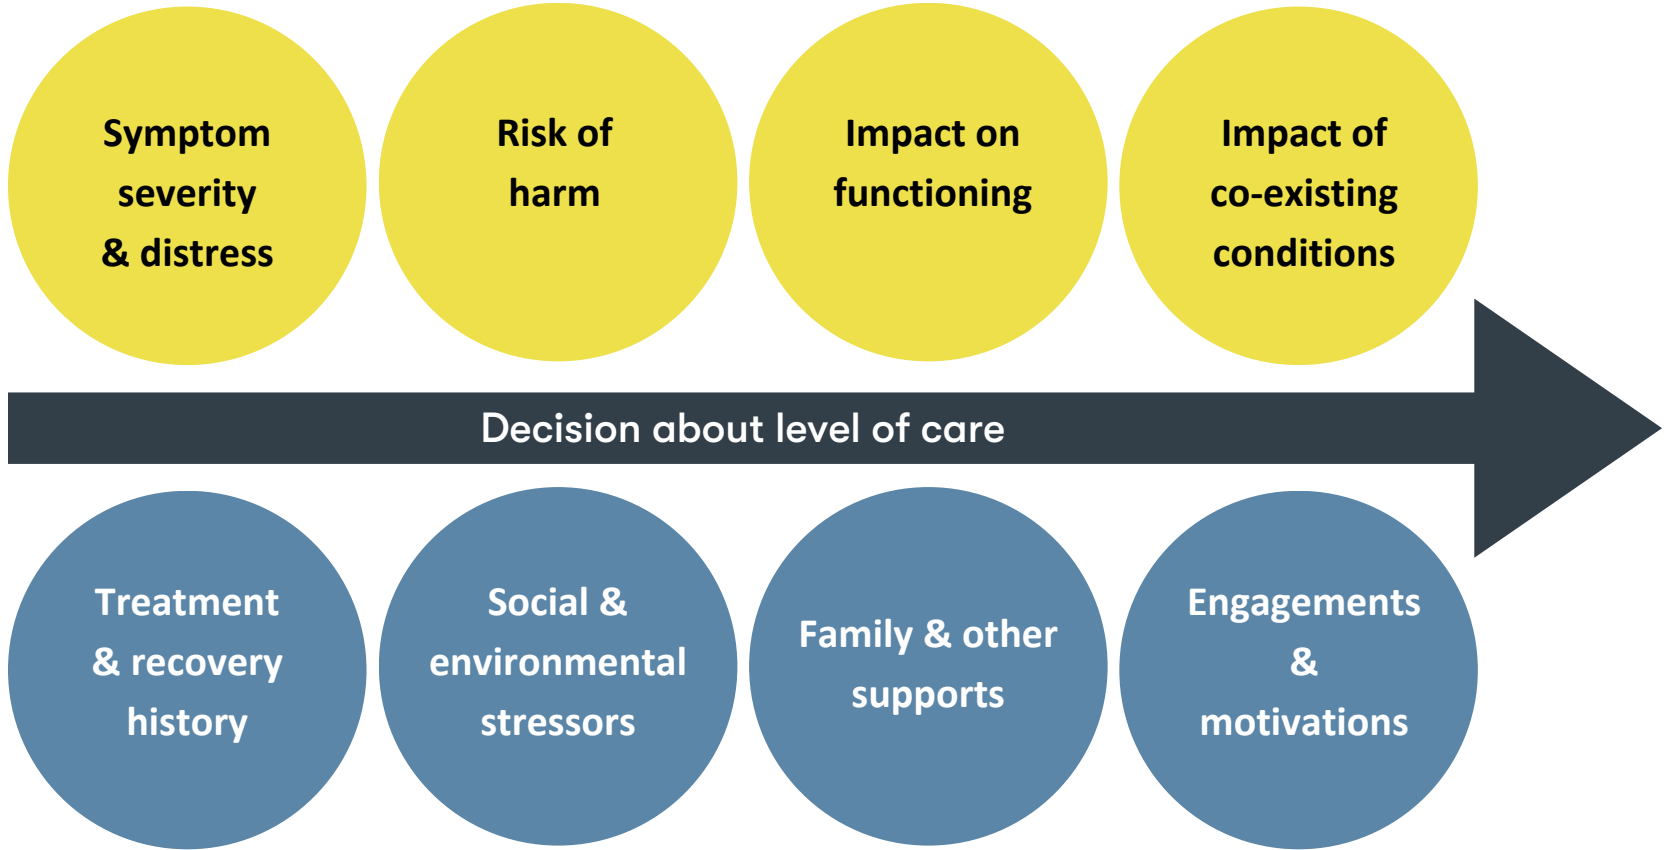

# Initial Assessment and Referral and Decision Support Tool (IAR-DST)

The IAR-DST is a tool which assists clinicians to support or confirm initial service recommendations for people who are presenting with mental ill-health or concerns. It acts as a standardised entry point when utilising the stepped care approach to mental health care to support patients to receive the right care at the right time.

The IAR-DST has 8 domains which represent key areas of a person’s presentation and life which may impact their mental health needs. This offers a whole person approach and is utilised in conjunction with clinical expertise, as well as mental health assessments such as DASS and K10.

<https://iar-dst.online/#/>

## Assessment Domains

The IAR-DST is informed by an IAR guidance which outlines the 8 domains and 5 levels of care within the stepped care approach.

There are adaptations currently available are based on age:

- Child (5-11)
- Adolescent (12-17)
- Adult (18-64)
- Older person (65+)

## Levels of care

Training is available through CHN to support the integration and use to the IAR-DST. Reimbursement is available for GPs. If you would like further information or to register for training, please email [IAR@chnact.org.au](mailto:IAR@chnact.org.au) or visit the [CHN website](#).
